Great Lakes Iron Ore Trade Down Nearly 6 Percent in August

CLEVELAND – Shipments of iron ore on the Great Lakes totaled 6 million tons in August, a decrease of 5.9 percent compared to a year ago. However, shipments outperformed the month's 5-year average by 1.4 percent.

Year-to-date the iron ore trade stands at 32.8 million tons, a decrease of less than 1 percent compared to the same point in 2018.

Through August iron shipments are nearly 5.4 percent ahead of their 5-year average for eight months of the year.

Since 1880, Lake Carriers' has represented the U.S.-flag Great Lakes fleet, which today can move more than 90 million tons of cargos annually that are the foundation of American industry, infrastructure, and power: iron ore, stone, coal, cement, and other dry bulk materials such as grain, salt, and sand. More information is available at www.lcaships.com.
